How to measure

Use a steel tape measure. Round to the nearest 1/8 inch.

Inside mount (blinds, shades)	Curtains
• Width inside the frame at top, middle, bottom • Write down the smallest width • Height at left, middle, right • Write down the longest height • Check the frame depth	• Frame width, outside edge to edge • Add 8 to 10 in each side for the rod • Decide rod height above the frame • Measure from there to the floor • Total fabric about 2 x rod width

Curtain length chart

Common ready-made lengths. Pick the one closest to, but not shorter than, your measurement.

Panel length	Usually fits
63 in	Sill or short windows, rods at a standard height
84 in	Floor length with rods around 7 ft high
95 to 96 in	Floor length with rods hung higher
108 in	Tall rooms, rods near a 9 ft ceiling
120 in	Very tall windows and ceilings

Lengths are measured from the top of the panel. Hem or use clip rings to fine-tune.

Room light log

Which way each room faces and when it's bright.

Room	Faces	Bright when	Glare?	Privacy need
